

Rules /Laws

You love the art of eyelash extensions and making your clients feel their most beautiful. But in addition to the fun aspects of eyelash extensions, you also have to keep track of some not-so-fun practical and legal details and Eyelash Laws per State.

Eye Lash Growth cycles

Every hair on your body follows a specific growth cycle and will grow to a specific length. Hair follows a three-phase growth cycle and eventually falls out which is typically nothing to worry about. In fact, body hair, including eyelashes, completely replaces itself every few years.

Adverse reactions

How to treat Swollen Eyes...The chemicals and other components that make up the eyelashes and adhesive products may cause an allergic reaction.

Contagious Disease

Recognizing infectious or contagious diseases of the eye and allergic reactions to materials.

Isolation and Separation

How to use tweezers properly to isolate one single natural lash by its self also you will learn how to separate your lashes throughout entire application properly.

Safety and Sanitation

We sanitize in order to make a surface, our hands, a tool, etcetera, clean and safe for use. Sanitation is an absolute necessity. When we sanitize, we

kill the single-cell microorganisms we call bacteria. There are trillions of bacteria, and not all are bad. Non-pathogenic bacteria are harmless and beneficial, but pathogenic bacteria are harmful and can cause infection. For this reason, a clean working environment is imperative.

Professional Image

Your professional image is your portfolio. This is the package you present that will influence whether or not people in this industry (both professionals and clients) will take you seriously enough to see what you actually have to offer.

Lash Application Eyelash Extensions

Eyelash extensions are synthetic lashes applied directly to your natural eyelash using an adhesive. These aren't the same as synthetic eyelash strips sold at mass retailers. Extensions come in little bundles of eight or nine individual lashes, and each bundle is glued directly onto your natural lash. The application procedure takes at least an hour when done by a professional and can take up to three hours for less experienced people. The extensions should last around anywhere from two to eight weeks and will fall out as your natural lashes fall out.

First Aid

Sometimes clients come to the appointment with eyelash extensions done by another technician. But the lashes may be hurting and twisting resulting in uncomfortable lash lines for the client. As well eyelash extensions may be too long or too thick for the client's natural lashes which can show up in short term or long term damage for the natural lashes.

Selection of Lash Types

Different Sizes, Lengths, Shapes and Color Extensions Lashes with a stronger curl have more impact from a frontal viewpoint and appear

longer than a straighter curl in the same your length of lashes and size truly depend on shape of face and eyes.

Salon Management

Creating a Constructive Environment. Communicating the expectations of your staff to your staff is paramount in effective management. ... A successful salon manager will strike a balance between unreachable and too close to employees. Management of any business is much more than just determining the overall job to be done and then delegating duties to employees. ... Before knowing what has to be done, the manager first must determine the short- and long-term goals of the salon in order to formulate a clear idea of what is to be achieved.
